Read the paragraph carefully

Symmetry is seen in nature all around us. In nature we see symmetry in leaves , butterflies, flowers etc. A figure is called symmetrical about a line , if it is folded about that line, the other two parts of figure coincide with each other.

Look at these figures which are symmetrical about a line

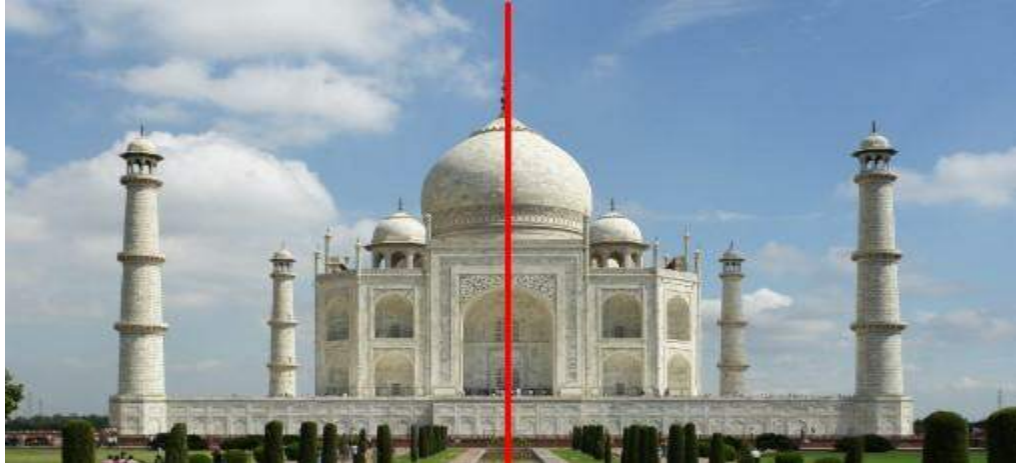

Q3. Write three letters of English alphabet (Draw on A4 sheet)

- (i) Having one line of symmetry
- (ii) Two lines of symmetry

Q4. Search and name few buildings having symmetry in architecture. Draw one building on A4 sheet or $\frac{1}{4}$ chart. (refer symmetry chapter of book)

For example:

Taj Mahal has one line of symmetry

Q5. Subtract the numbers with different denominators. Visit the link provided below and watch the video and draw visual subtraction of fractions with unlike denominators as shown.

https://www.youtube.com/watch?v=poGjjX_VNbM

Visual Subtraction Of Fraction With Unlike Denominators

9 $\frac{3}{4} - \frac{5}{8}$

$\frac{3}{4}$ $\frac{5}{8}$

- LCM of 4 and 8 = 8

- $\frac{3 \times 2}{4 \times 2} - \frac{5}{8} = \frac{6}{8} - \frac{5}{8}$

$\frac{6}{8} - \frac{5}{8}$

$-\frac{1}{8}$

Result:-
Hence, Subtraction Of Fraction With Unlike Denominators is proved visually.

Q6. Draw a big square. Convert into four small squares by paper folding activity. Now we can see each part is $\frac{1}{4}$ of the whole.

Again you can divide figure into other parts as directed in the figure and decide the value of each part.
