As the lockdown continues and we all are confined to home. This has left many street animals wandering for food and water in hot summers.

It is time to come forward and help them. Your little contribution and effort will help these silent sufferers.

1. Put bowls of water- Put mud/ plastic bowls of water for stray animals during summers. You do a noble work as thirsty birds and animals can have water from the bowl.
2. Feed the birds and the street animals- Spread grains like rice, chana etc. on your rooftops, open areas and balconies to feed birds. Give some food to street animals so that they can survive.
